## Website For Doctors

Dear Doctor,

Get your website made by professionals who understand healthcare

[www.websitefordoctors.in](http://www.websitefordoctors.in)

## How it works

Websites fall under 3 categories each having a growing and unique feature set, the basic plan, the advance plan and expert plan. Select a plan as per your budget and the extent of the information you wish to publish.

Follow the Simple 3 step process:

a. Select a template - from our extensive specialization based gallery at our website: [www.websitefordoctors.in](http://www.websitefordoctors.in) and a URL of your choice (e.g. [www.drkelkar.com](http://www.drkelkar.com), [www.drhatia.in](http://www.drhatia.in), [www.pediatrics-mumbai.com](http://www.pediatrics-mumbai.com)) (subject to availability) and contact us via the website or the contact details provided.

b. Finalize the template and send across your data: Name of clinic, resume, details about you, services provided about you, blog, pictures of your clinic, pictures of you or your work, contact information, information of your timings etc. Let us know which plan you are going for and make a 50% advance payment.

c. We will publish your website and it will be live in 5 working days, once we receive all your information. This is applicable only for the basic plan, higher plans may take longer. Once the site is live and you are satisfied make your complete payment.

## Our live work

## Why a Website ?

A website is like a 24 hours a day, 7 days a week secretary who never goes on leave. When your practice closes for the day, the Website continues work by providing patients support, potential clients clinic details, and critical information needed by all.

As a Doctor it is vital for you to communicate with your patients. A website provides you with an ideal tool to do so with minimal headache. Today clinics which have a presence on the web see more foot falls in urban centers as people begin to search for doctors and hospitals close to their residence or work place using the computer or the phone.

## Benefits

\* 24/7 customer service: The website can be accessed by a patient anytime for information or you can be contacted using an online query form

\* Flexibility: allows you to update information about yourself and your clinic instantly, reaching many from a single location

\* Reaching new ears: Search engines over time will start putting your website on top on specific searches, thereby directing new traffic to your site

\* Medium of communication: Allows you to share information about your clinic, services, unique cases from a single medium

\* Cool tools: Some are listed below, wouldn't you want to be the proud owner of a website with some of these?

- Medical calculators for BMI, fertility, child weight and height etc
- Online EMR, your patient medical records available on your website
- Maps to your clinic and hospital with directions easily accessible from the phone, now never give directions!
- Online Forms, collect vital information before the patient comes, prevent queues and save time
- Patient education videos
- SMS Prescription reminders for your patients
- Forums
- Video and Image galleries
- Your own Blog
